

PICKLEBALL FIXTURES

SimplySnap® Wireless Lighting Controls

Smart, wireless lighting control for pickleball facilities. SimplySnap® optimizes lighting, reduces energy costs, and creates the ideal playing environment for courts of any size.

Professional Pickleball Court Lighting Design

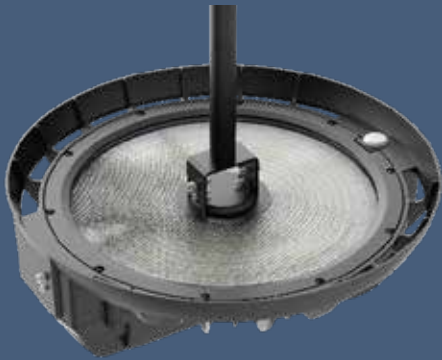

Spitzer Lighting provides expert photometric lighting layouts for indoor and outdoor pickleball facilities, delivering optimal visibility and uniform illumination.

High-Performance Pickleball Lighting

The HRA provides wide, even illumination, while the LHA delivers precise optics with reduced glare for enhanced visibility. Both are available with multiple lumen packages, beam distributions, and wireless control options.

HRA

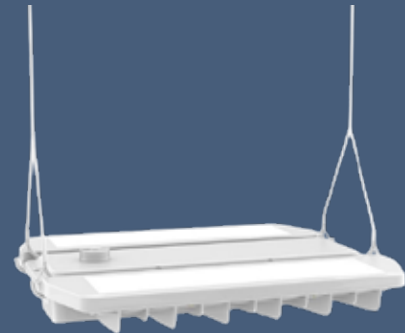

High Efficiency Round High Bay (HRA) delivers bright, uniform illumination for indoor pickleball courts with reduced glare and minimal shadows. Built for demanding indoor environments, it features a built-in hanging hook for quick installation and an optional surface-mount kit for added installation flexibility.

LHA

Linear High Bay Advanced (LHA) delivers uniform, high-efficiency illumination for indoor pickleball courts. Advanced optics reduce shadows and improve ball visibility, while versatile mounting options make it ideal for a variety of court layouts and ceiling heights.
